

At the Push of a Button!

Imagine everything in your home integrated into a central system, controllable through your voice, a keypad, the telephone, a computer, or any web enabled device. Unlock doors, open windows, close drapes, turn on lights, open the gate, adjust the temperature, view your security cameras, turn on music, or fill the bath, all at the push of a button. Your automobile comes pre-packaged with many of these conveniences, saving you time and making you comfortable. Isn't it time your home steps up to the 21st Century?

Not All Systems are Created Equally!

In an industry plagued by dealer loyalty and overly inflated product margins, CHC breaks the mold as leading-edge

design consultant programmers of home automation, audio video, computer network, and graphic user interfaces. Neither our education nor our financial model is built on the backs of manufacturers, which affords us the objectivity that our competition cannot offer. We implement technology based solely on the benefit of the client and the project.

CHC is nationally recognized as an industry leader in home electronic integration. Our knowledge comes from more than 17 years of award winning projects. Our customers experience the power of making educated decisions on their home systems, costs savings to exponentially exceed our fees by deciphering fact and fiction of a sales pitch, and a system completely customized to them, resulting in easy interaction on a daily basis.

CHC Expertise

As consultant designers, CHC's industry expertise spans over virtually every electronic device in the home, including:

Wiring Infrastructure
Lighting Control
Home Theater
Zoned Audio Systems
Distributed Video
Climate Control

HVAC, Fireplaces, Fans
Security Infrastructure
Integrated Automation

Electric Door Locks, Drapes and Windows
Garages and Gates
Pool and Irrigation
Control Networks
High Speed Internet
Wired and Wireless Computer Networking
Computer, Telephone, Keypads, Touchscreens

User Interface & Graphic Design

The CHC Advantage

CHC projects have five significant advantages over the competition:

Convergence of Computers & Audio Video
Open Architecture Off the Shelf Electronics
Service Based Business Model
Strack Record with over 17 years of Accolades
Solutions for a complete system

These cutting-edge business practices empower our clients to save significant money over the life of the project.

CHC Portfolio

CHC designed homes have received numerous awards, including: "Mark of Excellence Award Winner"-2000 Home Automation Association, "Top 50 Installers of the Year"-1999 Electronic House, "1st Place"-1989 National Builders Association, "1997 HA Pro System of the Month", and "1st Place"-1989 Street of Dreams.

1st Place—
National Builders 1989

Our projects have attracted attention as homes of the future from national television media such as TBS and ABC News San Diego.

We have also been featured in articles in *Electronic House Magazine*, *HA Pro Magazine*, *Smart Money*,

1997 HA Pro
System of the Month

New York Times Magazine, and *CE Pro*, along with designing the cover homes of *Audio Video Interiors*, *San Diego Home/Garden*, and *San Diego* magazines.

1st Place—
Street of Dreams 1989

In addition, our Chief Architect is regularly asked to be a featured speaker at various Home Electronic Shows throughout the industry.
